ACO MONITOR™ System Requirements

Product No.: MON400

Notice:
Your system may require installation of IBM PTF's to ensure proper operation of the ACO products. Several important IBM PTF's are required to properly run certain SQL statements based on the installed version of IBM i. These PTF's are included in the latest version of the database group PTF for each respective release.

IBM i 7.2 required PTF's (not included in cumulative package)
None

IBM i 7.1 required PTF's (not included in cumulative package)
None

We STRONGLY recommend that you put in place a process to regularly obtain (and apply) the latest cumulative PTF, HIPER group PTF, and database group PTF packages to your IBM i (formerly AS/400) system(s).

All DDL Systems products have earned IBM's "Ready for Power Systems" validation and are compatible with all currently supported releases of IBM i.

System Requirements

ACO MONITOR™

Hardware Requirements
- IBM Power System
- (Optional) One V.24 SDLC communications line (TAP messaging only)
- (Optional) One internal/external modem (TAP messaging only)
- (Optional) Smartphone (iphone or android)

Software Requirements
- IBM i V7R1 (or higher)
- A properly configured IBM i e-mail (SMTP) service
- Email and/or sms text messaging client

ACO ENTERPRISE™

Hardware Requirements
- IBM Power System

Software Requirements
- IBM i V7R1 (or higher)
- At least one licensed copy of ACO MONITOR™
- One of the following separately licensed software products
  - HP OpenView (OVO)
  - IBM Tivoli® Monitoring
  - IBM Netcool/OMNIbus
  - SYSLOG server

The enterprise system software may also require the purchase of other related hardware and licensed software. This hardware and software is available from IBM (or other business partners) at an additional fee and is not included with the purchase of the ACO ENTERPRISE™ software product.
